

P 4492

Henry Peter

This image is a high-contrast, black-and-white scan of a surface with a complex, organic texture. The pattern consists of numerous thin, dark lines that form a dense grid-like structure. These lines are irregular in length and orientation, creating a sense of depth and movement. Some lines are straight, while others are curved or broken. The overall effect is reminiscent of a microscopic view of a biological tissue or a close-up of a natural material like wood grain or bark. The high contrast between the dark lines and the light background emphasizes the intricate details of the texture.
